Site clearance; Obtain the architect or building plan; Get the necessary materials ready (i.e. pegs, nails, rope or line, hammer, tape, marking tool etc)

~~HOW TO SET OUT A BUILDING (SETTING OUT) PROCEDURE~~

Setting out is the process of developing the physical positions of corners and walls of a building, and it ' s done by transferring dimensions from the layout plan. Setting out clearly defines the outline of the excavations and the centre line of the walls, so that the construction can be carried out according to the plan. A building is set out in order to accurately define the outline and width of the excavation and to determine the center line of the proposed building walls, so that ...

~~Steps in Setting Out a Building Plan – Engineering Basic~~

1. Setting Out Building by Coordinates. A building can be set out by taking referencing from an already established baseline. An

Access Free Setting Out Procedures For The Modern Built Environment

irregular building or a building having a complex geometry can be also be located using the same method. For each corner of the building, a grid line can be established from the baseline. 3.

~~Setting Out Survey – Site Setting Out & Building Layout ...~~

The basic steps involved in setting out the foundation trenches are: The initial step is to mark the corners of the building. After which, the lengths of the sides are checked by diagonal measurements. The axial lines (center lines) of the trenches are marked with the help of profiles, sighting rails, strings, and pegs.

~~Setting Out Building Foundations on Ground~~

- Setting out is done on the principle of whole to part. According to this principle the largest possible rectangle of the building is found and set out. The rectangle is further partitioned into small parts (internal rooms).
- The first thing we need to establish is a parallel/ reference/ base line, to which all other lines can be related.

~~Setting out of building – SlideShare~~

Setting out building foundation, setting out buildings procedure. setting out building profiles, setting out buildings methods, setting out excavations. A building is set out in order to clearly define the outline of the excavation and the centre line of the walls, so that construction can be carried out exactly according to the plan.

~~How to Set Out a Building Plan on Ground with Procedure?~~

2. Introduction Setting out is the process of transferring the distance from the plan already prepared, to the ground before starting a construction. The plan as designed and prepared is set out on the ground in the correct position. The branch of surveying dealing with the setting out on the ground is known as construction surveying.

~~Setting out work – SlideShare~~

To set out right angles in the field, a measuring tape, two ranging poles, pegs and three persons are required. The first person holds together, between thumb and finger, the zero mark and the 12 metre mark of the tape. The second person holds between thumb and finger the 3 metre mark of the tape and the third person holds the 8 metre mark.

~~4. SETTING OUT RIGHT ANGLES AND PERPENDICULAR LINES~~

Setting out is the process by which information is taken from the construction design drawings, and pegs, profiles or other marks are then set to control the construction works and ensure that each element of the works is constructed in the right position and to the correct level.
