~~SIP: Understanding  
the Session  
Initiation Protocol,  
Fourth ...~~

SIP uses a request/response method to establish communications between various components in the network and to ultimately establish a call or session

# Access PDF Sip Understanding

The Session Initiation Protocol (SIP) is a signaling protocol used for initiating, modifying, and terminating sessions between two or more endpoints. A single session may involve several clients and servers. Identification of users in a SIP network works through a unique phone or extension number.
