Your vessel may be equipped with the most advanced technology and the most powerful engines, but the failure to apply the basic principles of bridge resource management can still prevent you from getting where you are going. Satellite systems, ARPA, electronic charts, AIS, sophisticated communication equipment and integrated navigational systems—all these advanced technologies provide valuable capabilities. But accidents still happen, and they usually involve human error. This simple fact has made Bridge Resource Management (BRM) training a requirement for watchkeepers worldwide. Bridge Resource Management for Small Ships: The Watchkeeper's Manual for Limited-Tonnage Vessels is the first book to address the unique needs of operators of small ships (limited-tonnage vessels) including tugs, ferries, yachts, and other passenger-carrying vessels. Features: Case histories to illustrate important points A complete course in BRM, suited for studying on your own as well as a complement to your classwork Topics include: Introduction to BRM, Standard Operating Procedures, Passage Planning, Implementing the Passage Plan, Building a Passage Plan, Situational Awareness and Human Factors, including: Overreliance, Distraction, Stress, Fatigue, Complacency, and Transition; and Human Interactions, including Communications, Teams and Teamwork, Decision Making and Leadership, and Human Error

U.S. Navy Diving Manual The U.S. Navy Diving Manual has long been regarded the ultimate resource for recreational, commercial and military divers and is widely considered to be the technical standard for diving information and procedures. Revision 7 Change A is the latest version released in April 2018 and includes major updates and changes from the previous versions. This extensive manual is just under 1000 pages spread over 5 Volumes with 18 Chapters and is unsurpassed in technical detail and depth. Radar and ARPA (Automatic Radar Plotting Aids) are standard systems on all commercial vessels and are widely used in the leisure maritime sector. This fully revised new edition covers the complete radar/ARPA installation, including AIS (Automatic Identification System) and ECDIS (Electronic Chart Display & Information Systems). It serves as the most comprehensive and up-to-date reference on equipment and techniques for radar observers using older and newer systems alike. Suitable for use both as a professional user's reference and as a training text, it covers all aspects of radar and ARPA technology, its use and its role in shipboard operations. Reference is made throughout to IMO (International Maritime Organisation) Performance Standards, the role of radar in navigation and in collision avoidance, and to international professional and amateur marine operations qualifications. * The most up-to-date book available, with full coverage of modern radar and ARPA systems, integrated electronic bridge systems and the 2004 IMO Radar regulations * The industry authority text, widely-used * Meets professional, educational and leisure maritime needs, covering both professional and amateur certificate requirements

For the first time ever, a comparative survey of 95 percent of the fiberglass pocketcruising sailboats ever built Author Steve Henkel has researched hundreds of cruising sailboats less than 26 feet long--pocket cruisers--to create this definitive gallery and handbook of the small cruising sailboats built in the last 45 years. With detailed plans, specifications, performance indexes, and commentary for every model the author could find (360 in all!), The Sailor's Book of Small Cruising Sailboats is your ideal core reference for the used and new boats you see on the water.
