In my next post I will go through some best practices around SQL server in a virtualized environment. This is a multi-part series on SQL Server best practices.

SQL Server Best Practices, Part I: Configuration

SQL Server uses the default port of 1433 which is widely known and most often DBAs don ' t change it. This is again a bad practice to use the defaults. Although one can argue that the SQL Server Boxes are secured by firewalls and antiviruses and all that fancy stuff but still it would be good to change the default port to someone else and get ...
