Read Book Study Guide Arthropods

Arthropodology is a biological discipline concerned with the study of arthropods, a phylum of animals that include the insects, arachnids, crustaceans and others that are characterized by the possession of jointed limbs. This field is very important in medicine, studied together with parasitology. Medical arthropodology is the study of the parasitic effect of arthropods, not only as parasites but also as vectors. The first annual Conference on Medical Arthropodology was held in Madurai in 2007.
