The population and technology explosions are shrinking the world to a system in which everything is interactive, forcing us to transcend traditional modes of thinking. In this book, the authors set forth the concept of multiple perspectives: technical, organizational, and personal. They begin the book with a multiple-perspective examination of the Exxon Valdez oil spill in Alaska, a case that foreshadows the intensifying problem of managing hazardous technology in the coming decades. They then apply this approach, on a much larger scale, to the United States in the evolving global setting. Included in the discussion are issues such as the balance between short-term and long-term concerns and between individual and societal responsibilities. The interdependence and inseparability of the three perspectives is reflected in the focus on technological superiority, organizational rethinking, and imaginative personal leadership. This book will help managers and students in business, engineering, science, and policymaking break away from exclusive concern with the technical perspective and thus help prepare them for the challenges of a new era.

“A standout . . . a balanced, informative, and highly intelligent guide to dealing with China.”—Fareed Zakaria Many see China as a rival superpower to the United States and imagine the country's rise to be a threat to U.S. leadership in Asia and beyond. Thomas J. Christensen argues against this zero-sum vision. Instead, he describes a new paradigm in which the real challenge lies in dissuading China from regional aggression while encouraging the country to contribute to the global order. Drawing on decades of scholarship and experience as a senior diplomat, Christensen offers a compelling new assessment of U.S.-China relations that is essential reading for anyone interested in the future of the globalized world. The China Challenge shows why China is nowhere near powerful enough to be considered a global “peer competitor” of the United States, but it is already strong enough to destabilize East Asia and to influence economic and political affairs worldwide. Despite China's impressive achievements, the Chinese Communist Party faces enormous challenges. Christensen shows how nationalism and the threat of domestic instability influence the party's decisions on issues like maritime sovereignty disputes, global financial management, control of the Internet, climate change, and policies toward Taiwan and Hong Kong. China benefits enormously from the current global order and has no intention of overthrowing it; but that is not enough. China's active cooperation is essential to global governance. Never before has a developing country like China been asked to contribute so much to ensure international stability. If China obstructs international efforts to confront nuclear proliferation, civil conflicts, financial instability, and climate change, those efforts will falter, but even if China merely declines to support such efforts, the problems will grow vastly more complicated. Analyzing U.S.-China policy since the end of the Cold War, Christensen articulates a balanced strategic approach that explains why we should aim not to block China's rise but rather to help shape its choices so as to deter regional aggression and encourage China's active participation in international initiatives that benefit both nations.

A violent cult called "The People" has executed each one and will stop at nothing to reach its last target: thirteen-year-old Adam. But Adam has no idea he's in danger. Raised by adoptive parents, he doesn't know his real birthday connects him to the other victims. Adam's life goes up in flames when a cult deserter tracks him down with a warning. The executive chairman and former CEO of Dunkin' Donuts and Baskin Robbins reflects on the unique, results-oriented discipline he's developed over decades of leadership, which provides a blueprint for any organization to achieve prosperity. We live in an era in which successful organizations can fail in a flash. But they can cope with change and thrive by creating a culture that supports positive pushback: questioning everything without disrespecting anyone. Nigel Travis has forty years of experience as a leader in large and successful organizations, as well as those facing existential crisis—such as Blockbuster as it dawdled in the face of the Netflix challenge. In his ten years as CEO and chairman of Dunkin' Brands, Travis fine-tuned his ideas about the challenge culture and perfected the practices required to build it. He argues that the best way for organizations to succeed in today's environment is to embrace challenge and encourage pushback. Everyone—from the new recruit to the senior leader—must be given the freedom to speak up and question the status quo, must learn how to talk in a civil way about difficult issues, and should be encouraged to debate strategies and tactics—although always in the spirit of shared purpose. How else will new ideas emerge? How else can organizations steadily improve? Through colorful storytelling, with many examples from his own career—including his leadership in turning around the fear-ridden culture of the London-based Leyton Orient Football Club, of which he is part owner—Travis shows how to establish a culture that welcomes challenge, achieves exceptional results, and ensures a prosperous future.
