Tax rates, tax laws, and special indicators that influence whether tax line items are included in the nota fiscal are all stored in the system as condition records. By means of mapping tables and tax code configuration, you can customize which values are written to which fields of the nota fiscal, and which tax lines are generated.

**SAP Library – Brazil**

SAP system provides tax version as per country level. We need to customize the tax procedures as per the organizational requirements. Major part of TAX customization will be done by MM consultant and SD consultant, however it is mandatory as the SAP FICO consultant should know about the outline configurations of the taxes.

**What is Sales Tax (Output Tax), Purchase Tax (Input Tax) –**

The tax codes configured in Softrax will be mapped to a Jurisdiction code in SAP. The Jurisdiction code is linked to a Tax code (as shown above). One Tax Code can be linked to multiple Jurisdiction codes. That means the same tax code OL, for example, can be tied to different Jurisdiction codes & have a different tax rate as shown below:

**SAP FICO Advanced – Taxes | Leading IT Services and –**

The tax jurisdiction code consists of up to four parts depending on the tax jurisdiction code structure for the relevant calculation procedure: the state code, the county code, the city code, and a local code component. The system uses these component parts to determine the tax rate for each tax authority. 6.
