Project success criteria is evaluating the successful outcome of project; these are dependent variable factors which measure the success of a project. One of the most uncertain concepts of project management is project success. People and groups involved in a project all have different needs and expectations, as such it is unsurprising that they will interpret the success of a project in their own way, (Cleland & Ireland 2004).

~~How Quantities Determine Success for Construction Project . . .~~

By the late 1980s a wider definition was being sought, which captured both the success of the management of the project, and the success of the project output. This was when the Project Management Institute held the conference noted earlier. Pinto and Slevin (1988) brought in both the internal (project) and the external (client) views.
