— David C Wheeler, Professor of Kidney Medicine, University College London, and President, Renal Association

Handbook offers information compiled from the UK Renal Pharmacy Group and features drug monographs guiding physicians in how to prescribe, prepare, and administer drugs to patients undergoing renal replacement therapy. Also provides a practice-based review of drug utilization in renal units across the UK.

A unique and comprehensive compendium on renal drugs, and drugs that affect renal function, this edition covers 170 additional drugs, making over 740 drug entries in all.

Chronic Kidney Disease affects approximately 10% of adults in the United States or approximately 20 million individuals. Further, recent studies have shown that improper dosing in patients with renal dysfunction occurs over 20% of the time. This new book addresses the persistent and challenging problem of dosing medications for patients with renal insufficiency and dysfunction.
