NSC: Fatigue a 'hidden but deadly epidemic'. July 26, 2017. Forty-three percent of U.S. workers believe they are too tired to function safely at work, according to a new report from the National Safety Council. Fatigue in the Workplace: Causes and Consequences of Employee Fatigue is based on a survey conducted by NSC of 2,000 working adults and their experience with fatigue.

NSC: Fatigue a 'hidden but deadly epidemic' | 2017-07-26 ...

Fatigue at Work, on the Road Can be Deadly. Daylight Saving Time begins every year on the second Sunday in March, which in 2019 was March 10. We "lose" an hour when the clocks are set forward (except in Hawaii and most of Arizona), and for many that means a tired couple of days as our bodies adjust.

Fatigue Home - National Safety Council

Fatigue is regarded as having an impact on work performance. Government of Alberta, Labour* reports that most incidents occur when people are more likely to want sleep - between midnight and 6 am, and between 1 to 3 pm. Government of Alberta, Labour also reports that fatigue affects people differently but it can increase a worker's hazard ...
