[Nontuberculous Mycobacteria \(NTM\) Infections | HAI | CDC](#)

These organisms (called nontuberculous mycobacteria) are commonly present in soil and water and are much less virulent in humans than is *Mycobacterium tuberculosis*. Infections with these organisms have been called atypical, environmental, and nontuberculous mycobacterial infections.

[Nontuberculous Mycobacterial Infections - Infectious ...](#)

There are many species of mycobacteria known to cause disease in humans. The two most widely known are *Mycobacterium tuberculosis*, which causes tuberculosis, and *Mycobacterium leprae*, which causes leprosy. The other *Mycobacterium* species are classified as "nontuberculous" to clearly set them apart.

[Learn about Nontuberculous Mycobacteria \(NTM\) | American ...](#)

The disease tuberculosis is caused by a different strain from the same broad family of bacteria. However, while tuberculosis spreads from person to person, nontuberculous mycobacterial infections of any kind are not contagious. You may develop a nontuberculous mycobacterial infection if you drink contaminated water.

[Diagnosing Nontuberculous Mycobacterial Infections | NYU ...](#)

Nontuberculous mycobacteria (NTM), also known as environmental mycobacteria, atypical mycobacteria and mycobacteria other than tuberculosis (MOTT), are mycobacteria which do not cause tuberculosis or leprosy (also known as Hansen's disease). NTM do cause pulmonary diseases that resemble tuberculosis.

[Nontuberculous mycobacteria - Wikipedia](#)

The term 'nontuberculous' is used to differentiate these disorders from the mycobacterium that cause tuberculosis (i.e. *Mycobacterium tuberculosis* complex). These disorders also exclude *Mycobacterium leprae*, the mycobacterium that causes leprosy.

Disease. Scrofula is the term used for lymphadenopathy of the neck, usually as a result of an infection in the lymph nodes, known as lymphadenitis. It can be caused by tuberculous or nontuberculous mycobacteria. About 95% of the scrofula cases in adults are caused by *Mycobacterium tuberculosis*, most often in immunocompromised patients (about 50% of cervical tuberculous lymphadenopathy).

[Mycobacterial cervical lymphadenitis - Wikipedia](#)

It is being tested in non-Novartis clinical studies for drug resistant tuberculosis and non-tuberculous mycobacteria (NTM). To be eligible for participation in this expanded access program, patients must have an NTM diagnosis. The treating physician has decided that this infection can be treated with Lamprene®/Clofazimine.

[UC Health Non-Tuberculous Mycobacterial \(NTM\) Infections ...](#)

Infection of *Mycobacterium tuberculosis* (MTB) and nontuberculous mycobacteria (NTM) challenges effective pulmonary infectious disease control. Current phenotypic and molecular assays could not comprehensively and accurately diagnose MTB, NTM, and drug resistance.

[Comprehensive Determination of Mycobacterium tuberculosis ...](#)

Summary. Mycobacteria are a type of germ. There are many different kinds. The most common one causes tuberculosis. Another one causes leprosy. Still others cause infections that are called atypical mycobacterial infections. They aren't "typical" because they don't cause tuberculosis. But they can still harm people, especially people with other problems that affect their immunity, such as AIDS.

[Mycobacterial Infections: MedlinePlus](#)

Although *Mycobacterium tuberculosis* and nontuberculous mycobacteria (NTM) cause chronic lung infections, only tuberculosis (TB) spreads from person to person by inhalation of organisms expectorated into the air. NTM infections are acquired directly from the environment, where they are often present in soil and various water sources.
