Two Billion Cars is a very informative book on transportation and sustainability issues. The premise of the book is that currently we have one billion cars, but in twenty years, the planet will have about two billion cars. If there are no changes, this growth in cars will be disastrous in terms of energy usage, congestion, and global warming.

Two Billion Cars: Driving Toward Sustainability | Request PDF

Two Billion Cars: Driving Toward Sustainability. Daniel Sperling, Deborah Gordon, Arnold Schwarzenegger. I dig this book. I grew up in the heart of Los Angeles and remember days when I could not run outside because the smog level was so bad that 10 minutes of running would do the lung damage of a pack of cigarettes.

Today there are over a billion vehicles in the world, and within twenty years, the number will double, largely a consequence of China's and India's explosive growth. Given that greenhouse gases are already creating havoc with our climate and that violent conflict in unstable oil-rich nations is on the rise, will matters only get worse?

Two Billion Cars Driving Toward Sustainability

At present, there are roughly a billion motor vehicles in the world. Within twenty years, the number will double to 2 billion, largely a consequence of China's and India's explosive growth. Given that greenhouse gases are already creating havoc with our climate and that violent conflict in oil-rich nations is on the rise, does this mean that matters will only get worse?
