The most important aspect of owning a grandfather clock is to take care of the grandfather clock movements. Generally, due to the different types of clocks available, finding the cause of the problem can be confusing. The rules are completely different for grandfather clocks that are more than 50 years old. They are classified as antiques.

Armbandsurets historie.

Provides detailed plans and instructions for making eighteen antique-style clocks, including grandfather, pillar and scroll, ogee, calendar, cottage, banjo, schoolhouse, regulator, steeple, mission-style, mantel, and tambour

"A how-to guide to diagnosing and correcting faults in clocks, antique and modern." -- Cover, p. [4].

The first and most comprehensive step-by-step guide on the subject, Watchmaking has become a classic in its own right. This new edition is updated to include a new section which discusses and illustrates a variety of the author's own watches. The author's principal aim in writing this book has been to inspire and encourage the art of watchmaking, especially among a new generation of enthusiasts. The making of the precision timekeeper is described, step by step, and is illustrated at each stage with line drawings and brief explanatory captions. Great care has been taken to ensure the text is easy to follow and to avoid complicated technical descriptions.
