Intended as an introductory course, this text contains updated institutional material which is international in scope and deals with the effects of electronic commerce. It provides tips, questions and answers and special features.

A practical introduction to understanding the Financial Management of companies in today ' s rapidly changing business world. This book is particularly well-suited to introductory courses in financial management, for a professional qualification and as a reference for practitioners.

This easy-to-understand, user-friendly reference tool covers the three major decision-making areas in financial management: the investment, financing, and asset management decisions. It enables readers to understand the financial decision-making process, interpret the impact that financial decisions will have on value creation, and develop a strong understanding of how funds are raised and allocated by today's businesses. Financial exploration includes the basic time value of money concepts, working capital management, capital budgeting techniques, estimating cash flows, electronic commerce, outsourcing, limited liability companies, strategic alliances, and financial statement analysis. For participants in management development programs, candidates preparing for various professional exams, and practicing finance professionals—such as Financial and Loan Analysts; Financial, Cash, and Credit Managers; Controllers, Managerial Accountants; Lending Officers, and Treasurers.
