Under the rule of a usurper king, the realm of Skala has suffered famine, plague, and invasion. But now the time for the rightful heir has come, a return to the tradition of warrior queens. And the Lightbearer's prophecy is to be upheld at last: so long as a daughter of the royal line defends and rules, Skala will never be subjugated. Now a mystical fire has burned away the male body known as Prince Tobin, revealing Princess Tamír, a girl on the verge of womanhood—and a queen ready to claim her birthright after a life in disguise under the protection of wizards and witches. But will her people, her army—and the friends she was forced to deceive—accept her? Worse, will the crown's rival heir, friend to Tobin, turn foe to Tamír, igniting civil war in a fierce battle for Skala?

comes from living in a city, surrounded by thousands of strangers. The Lonely City is a roving cultural history of urban loneliness, centered on the ultimate city: Manhattan, that teeming island of gneiss, concrete, and glass. What does it mean to be lonely? How do we live, if we're not intimately involved with another human being? How do we connect with other people, particularly if our sexuality or physical body is considered deviant or damaged? Does technology draw us closer together or trap us behind screens? Olivia Laing explores these questions by travelling deep into the work and lives of some of the century's most original artists, among them Andy Warhol, David Wojnarowicz, Edward Hopper, Henry Darger and Klaus Nomi. Part memoir, part biography, part dazzling work of cultural criticism, The Lonely City is not just a map, but a celebration of the state of loneliness. It's a voyage out to a strange and sometimes lovely island, adrift from the larger continent of human experience, but visited by many - millions, say - of souls"--

A gripping novel of human ingenuity during World War II, based on the visionary author's own wartime experiences as a radar control operator. One of the most influential science fiction writers of the twentieth century, Arthur C. Clarke has consistently anticipated the actual achievements of science and technology. In *Glide Path*, he turns back the clock to tell a thrilling story about the groundbreaking exploration of radar during WWII. Clarke's only non-science fiction novel shines with the same qualities that made his award-winning space adventures timeless classics: topnotch suspense, fascinating science, and memorable characters. A hidden gem in Clarke's impressive body of work, *Glide Path* is an enthralling read for both science fiction fans and history aficionados.

In *News from Heaven*, Jennifer Haigh—bestselling author of *Faith* and *The Condition*—returns to the territory of her acclaimed novel *Baker Towers* with a collection of short stories set in and around the fictionalized coal-mining town of Bakerton, Pennsylvania. Exploring themes of restlessness, regret, redemption and acceptance, Jennifer Haigh depicts men and women of different generations shaped by dreams and haunted by disappointments. Janet Maslin of the *New York Times* has called Haigh's Bakerton stories "utterly, entrancingly alive on the page," comparable to Richard Russo's *Empire Falls*.
