Web Development With Jade Lang

Jade is an templating engine, primarily used for server-side templating in NodeJS.

Jade - Template Engine

"This is a step-by step, tutorial-based book which will enable web developers to explore the functionalities of Jade and learn how to use it to write certain functions and processes for web development. This book is for web developers with at least a basic understanding of HTML and JavaScript.

Web Development with Jade ISBN 9781783286355 PDF epub ...

JADE is a proprietary object-oriented software development and deployment platform product from the New Zealand-based Jade Software Corporation, first released in 1996. It consists of the JADE programming language, Integrated development environment and debugger, integrated application server and object database management system. Designed as an end-to-end development environment to allow systems to be coded in one language from the database server down to the clients, it also provides APIs for

Getting Started Installation ¶. Pug is available via npm: \$ npm install pug Overview ¶. The general rendering process of Pug is simple. pug.compile() will compile the Pug source code into a JavaScript function that takes a data object (called "locals") as an argument. Call that resultant function with your data, and voilà!, it will return a string of HTML rendered with your data.

Google

Pug (renamed from 'Jade') is a templating engine for full stack web app development. It provides a neat and clean syntax for writing HTML and maintains strict whitespace indentation (like Python). It has been implemented with JavaScript APIs. The language mainly supports two iteration constructs: each and while. 'for' can be used instead 'each'.
