Every year, millions of children across the country get arrested. What most adults do not know is that the juvenile justice system has become much more punitive in the last fifteen years. No longer is juvenile court a place where regardless of what happens you get a clean slate when you turn eighteen. Today almost every adjudication of delinquency is accompanied by adult-style fingerprinting, prior record score points, and DNA tests that can stay in a state repository for years. For every stage of the justice system, from arrest to expungement, When Kids Get Arrested gives "top tips" to help adults make the best choices to protect children from long-term negative consequences. Sandra Simkins provides straight answers to common questions such as: Should I let my child talk to the police without a lawyer? How can I help my child succeed on probation? Should my child admit to the charges or take the case to trial? How will this case impact my child's future? Will it prevent him from getting a job or going into the army? My child has mental health issues. Can the juvenile justice system help? My daughter is out of control. Should I call the police? My son got arrested at school and is now suspended. What should I do next? Simkins takes complicated legal concepts and breaks them down into easy-to-understand guidelines. She includes information on topics such as police interrogation, detention hearings, and bail, along with state-by-state specifics. When Kids Get Arrested is a perfect resource for parents, social workers, guidance counselors, teachers, principals, coaches, and anyone else who works with children.

"When someone you love goes to jail, you might feel lost, scared, and even mad. What do you do? No matter who your loved one is, this story can help you through the tough times."--from cover, p. [4]

Two Englishmen on a crime spree break American laws! Stupid, unreasonable, and long-forgotten laws—but laws just the same. In 1787 the wise framers of the U.S. Constitution laid out the laws of the land. Since then, things have gone awry, and a few laws even the far-sighted framers couldn't have imagined have worked their way onto the books in towns and cities across the country. Did you know that in the United States it's illegal to: • Fish while wearing pajamas in Chicago, Illinois? • Enter a theater within three hours of eating garlic in Indianapolis? • Offer cigarettes or whiskey to zoo animals in New Jersey? • Fall asleep in a cheese factory in South Dakota? Englishman Rich Smith discovered these little-known laws during a great American crime spree that took him from coast to coast in search of girls to kiss (it's illegal to kiss for longer than five minutes at a time in Kansas), oranges to peel (which the law says shouldn't be done in hotel rooms in California), and whales to hunt (unlawful in Utah). What inspired a perfectly law abiding, mild-mannered Englishman to come to America and take on the law? He simply wanted to know why. How did these "only in America" laws come to be, do the police know they exist, and would they care if he broke them? So with his best mate, Bateman, by his side—and at the ready should bail be required—Smith set out to break the law in the United States. Part road trip, part chronicle of the absurdity of human behavior, part search for the ultimate in roadkill, You Can Get Arrested for That follows Smith and Bateman on their not quite Bonnie and Clyde adventure.

My Kid is Doing Drugs and Got Arrested: Now What? is my story of hope and success. The book gives information about the widespread societal problem of teen substance abuse. It explains how teens become hopelessly addicted to drugs and the horrible feeling of craving that drives the teen to use drugs. It alerts parents to the subtle signs of substance abuse and explains the connection with co-existing mental illness. More importantly, I tell my personal story of my son, Matt's rock bottom drive into the depths of addiction and his coexisting bipolar disorder, and how as a family we dealt with it. You will learn about Matt's arrest, rehab, and recovery told from my perspective as a mother and health care provider. I offer insight into the feelings of fear, hopelessness, and failure as a parent. You will learn how this problem affected my family and how we weathered the storm. I use stories that illustrate important issues for parents to recognize in their teens. Suggestions for treatment are offered

Who would have believed that The Adventure of Huckleberry Finn could cause the worst crisis in the history of George Mason High School? Certainly not Barney Roth, editor of the school paper. But when a small but vocal group of students and parents decide that the book is racist, sexist, and immoral--and should be removed from reading lists and the school library--Barney takes matters into his own hands. When the Huck Finn issue comes up for a hearing, Barney decides to print his story about previous censorship efforts at school. He's sure that investigative reporting and publicity can help the cause. But is he too late to turn the tide of censorship?

Timothy is on probation. It's a strange word--something that happens to other kids, to delinquents, not to kids like him. And yet, he is under house arrest for the next year. He must check in weekly with a probation officer and a therapist, and keep a journal for an entire year. And mostly, he has to stay out of trouble. But when he must take drastic measures to help his struggling family, staying out of trouble proves more difficult than Timothy ever thought it would be. By turns touching and funny, and always original, House Arrest is a middlegrade novel in verse about one boy's path to redemption as he navigates life with a sick brother, a grieving mother, and one tough probation officer.

Even though youth crime rates have fallen since the mid-1990s, public fear and political rhetoric over the issue have heightened. The Columbine shootings and other sensational incidents add to the furor. Often overlooked are the underlying problems of child poverty, social disadvantage, and the pitfalls inherent to adolescent decisionmaking that contribute to youth crime. From a policy standpoint, adolescent offenders are caught in the crossfire between nurturance of youth and punishment of criminals, between rehabilitation and "get tough" pronouncements. In the midst of this emotional debate, the National Research Council's Panel on Juvenile Crime steps forward with an authoritative review of the best available data and analysis. Juvenile Crime, Juvenile Justice presents recommendations for addressing the many aspects of America's youth crime problem. This timely release discusses patterns and trends in crimes by children and adolescents--trends revealed by arrest data, victim reports, and other sources; youth crime within general crime; and race and sex disparities. The book explores desistance--the probability that delinquency or criminal activities decrease with age--and evaluates different approaches to predicting future crime rates. Why do young people turn to delinquency? Juvenile Crime, Juvenile Justice presents what we know and what we urgently need to find out about contributing factors, ranging from prenatal care, differences in temperament, and family influences to the role of peer relationships, the impact of the school policies toward delinquency, and the broader influences of the neighborhood and community. Equally important, this book examines a range of solutions: Prevention and intervention efforts directed to individuals, peer groups, and families, as well as day care-, school- and community-based initiatives. Intervention within the juvenile justice system. Role of the police. Processing and detention of youth offenders. Transferring youths to the adult judicial system. Residential placement of juveniles. The book includes background on the American juvenile court system, useful comparisons with the juvenile justice systems of other nations, and other important information for assessing this problem.

Adolescence is a distinct, yet transient, period of development between childhood and adulthood characterized by increased experimentation and risk-taking, a tendency to discount long-term consequences, and heightened sensitivity to peers and other social influences. A key function of adolescence is developing an integrated sense of self, including individualization, separation from parents, and personal identity. Experimentation and novelty-seeking behavior, such as alcohol and drug use, unsafe sex, and reckless driving, are thought to serve a number of adaptive functions despite their risks. Research indicates that for most youth, the period of risky experimentation does not extend beyond adolescence, ceasing as identity becomes settled with maturity. Much adolescent involvement in criminal activity is part of the normal developmental process of identity formation and most adolescents will mature out of these tendencies. Evidence of significant changes in brain structure and function during adolescence strongly suggests that these cognitive tendencies characteristic of adolescents are associated with biological immaturity of the brain and with an imbalance among developing brain systems. This imbalance model implies dual systems: one involved in cognitive and behavioral control and one involved in socio-emotional processes. Accordingly adolescents lack mature capacity for self-regulations because the brain system that influences pleasure-seeking and emotional reactivity develops more rapidly than the brain system that supports self-control. This knowledge of adolescent development has underscored important differences between adults and adolescents with direct bearing on the design and operation of the justice system, raising doubts about the core assumptions driving the criminalization of juvenile justice policy in the late decades of the 20th century. It was in this context that the Office of Juvenile Justice and Delinquency Prevention (OJJDP) asked the National Research Council to convene a committee to conduct a study of juvenile justice reform. The goal of Reforming Juvenile Justice: A Developmental Approach was to review recent advances in behavioral and neuroscience research and draw out the implications of this knowledge for juvenile justice reform, to assess the new generation of reform activities occurring in the United States, and to assess the performance of OJJDP in carrying out its statutory mission as well as its potential role in supporting scientifically based reform efforts.
