Conrad Alvin Lim (Author of Secrets of Millionaire Investors)

A risk management process for a trading system is not just math but also includes human psychology. The psychology of execution is just as important to profitability as the trading dynamics of the entries and exits of a trading method. Humans have fear, greed, and egos and these elements can interfere with the process of trading the right position size, cutting a loss, and letting a winner run.

The Psychology of Risk For Traders | New Trader U

The Accurate Trader. These traders are noted for their tendency to use detailed analytical processes and keep meticulous and accurate records. Traders with this psychological profile often keep detailed notes of their decision making process in their trading journals, which tends to help them on future trades.
