Law, policy, and practice in the United States has long held that students with disabilities - including those with intellectual disabilities - have the right to a free and appropriate public education, in a non-restrictive environment. Yet very few of these students are fully included in general education classrooms. Educational systems use loopholes to segregate students; universities regularly fail to

train teachers to include students; and state regulators fail to provide the necessary leadership and funding to implement policies of inclusion. *Whatever Happened to Inclusion?* reports on the inclusion of students with intellectual disabilities from national and state perspectives, outlining the abject failure of schools to provide basic educational rights to students with significant disabilities in America. The book then describes the changes that must be made in teacher preparation programs, policy, funding, and local schools to make the inclusion of students with intellectual disabilities a reality.

"Inclusive education" is the term now used to describe the incorporation of special needs into mainstream education. This selection of papers provides perspectives and dialogue on inclusive education from around the world, defining the philosophical, political and educational implications.

This book challenges the common perception that global politics is making progress on indigenous issues and argues that the current global care for indigeneity is, in effect, violent in nature. Examining the inclusion of indigenous peoples in the United Nations Permanent Forum on Indigenous Issues and the Arctic Council, the authors demonstrate how seemingly benevolent practices of international political and legal recognition are tantamount to colonialism, the historical wrong they purport to redress. By unveiling the ways in which contemporary neoliberal politics commissions a certain type of indigenous subject—one distinguished by resilience in particular—the book offers a pioneering account of how international politics has tightened its grip on indigeneity.

This year's edition brings together research and essays on comparative education trends and directions written by professional and scholarly leaders in the field. Topics covered include theoretical and methodological developments, reports on research-to-practice, area studies and the diversification of comparative and international education.

Providing a clearly written, wide-ranging overview of current key issues and challenges arising from the implementation of more inclusive policies and provision in education, the author sets these policies in context and provides a critical analysis.

This comprehensive collection provides a global perspective on inclusive education. The existing literature delves into whether inclusive practice is about educating children with disabilities or children from diverse backgrounds. The articles in this compilation assert that it is both. Inclusive Education Across Cultures: Crossing Boundaries, Sharing Ideas brings together multiple perspectives to present a compelling case for inclusive practice in different areas of inclusive education, ranging from policy initiatives to practices on the ground level, and advocating and creating awareness. The articles present examples that are explicitly disability-focussed and at the same time present a vision of inclusion that is about societal reform. These articles provide a voice to the people living with disabilities and enable us to learn from their stories. They not only provide theoretical information, but also connect theory and practice by discussing implemented models and practical resources. This work will be a valuable resource material for all those involved in the study of education, social work and psychology.

The Journal of School Leadership is broadening the conversation about schools and leadership and is currently accepting manuscripts. We welcome manuscripts based on cutting-edge research from a wide variety of theoretical perspectives and methodological orientations. The editorial team is particularly interested in working with international authors, authors from traditionally marginalized populations, and in work that is relevant to practitioners around the world. Growing numbers of educators and professors look to the six bimonthly issues to: deal with problems directly related to contemporary school leadership practice teach courses on school leadership and policy use as a quality reference in writing articles about school leadership and improvement.

Each of these chapters in this book of political counterfactuals describes a premiership that never happened, but might easily have done had the chips fallen slightly differently. The contributors, each of them experts in political history, have asked themselves questions like: what shape would the welfare state and the cold war have taken if the Prime Minister had been Herbert Morrison instead of Clement Attlee? What would have been consequences for Northern Ireland had Norman Tebbit succeeded Margaret Thatcher? How would our present life be different without New Labour - a name we would never have heard if either Kinnock or Smith had become Prime Minister and not Tony Blair? Each of the chapters in this
