Yamaha BR15 Speaker Product overview What Hi-Fi? Ein solches Manual lebt doch geradezu von der bildlichen Darstellung der Arbeitsschritte - bei diesem hier muss man schon sehr genau hinschauen! Schade, denn rein inhaltlich hat das Buch, nach erster schneller Durchsicht, sehr viel zu bieten. Alterna... - ach nein, sagen wir doch lieber: konkurrenzlos, ganz wie erwartet. Wenn man die ganze Arbeit bedenkt, die drinsteckt - als Autor würde ich ...
This book addresses the growing needs in deciphering the biological processes associated with fish reproduction, in view of the growth of aquaculture and the dwindling natural stocks of commercially important fish. It presents a comprehensive overview on egg production in fish, from the standpoint of the oocyte. With this view in mind, the book includes chapters on oocyte development (oogenesis), hormonal regulation and hormone receptors, formation of the egg envelopes, growth, accumulation of nutrients and maternal transcripts, maturation, hydration, ovulation and fertilization. A special emphasis is placed on using state-of-the-art tools including electron microscopy for discerning the ultra-structure of the follicle and genomic/proteomic tools to fully understand biological basis of fish reproduction. Studies on promoting oocyte maturation, ovulation and spawning in farmed fish and preservation of fish oocytes at low temperatures are also included. The book will appeal to University lecturers, students, research scientists and those associated with culture of fish in freshwater or marine aquaculture.
The three pieces in Idaho Gems capture the spirit of this northwestern state. "White Pine Waltz" begins with a delicate melody in 3/4 meter inspired by the majestic western white pine, Idaho's state tree. The piece builds to a climactic middle section featuring flowing arpeggios in both hands before subsiding into a restatement of the theme. The second piece, "Craters of the Moon," paints a picture of the volcanic landscapes found in the national preserve of the same name. A repetitive chromatic figure in the lower register is combined with dissonant intervals in the upper register to capture the eerie otherworldliness of the park's lava fields. In "Snake River Rag," chromatic passages wind their way across the keyboard, inspired by the Snake River's twisted path through the Idaho countryside. "Western Gem" provides a dynamic conclusion to the suite. The piece makes full use of the keyboard with block chords and scalar passages in both hands, while a modulation in the middle section provides an additional musical challenge.
Just War scholarship has adapted to contemporary crises and situations. But its adaptation has spurned debate and conversation'a method and means of pushing its thinking forward. Now the Just War tradition risks becoming marginalized. This concern may seem out of place as Just War literature is proliferating, yet this literature remains welded to traditional conceptualizations of Just War. Caron E. Gentry and Amy E. Eckert argue that the tradition needs to be updated to deal with substate actors within the realm of legitimate authority, private military companies, and the questionable moral difference between the use of conventional and nuclear weapons. Additionally, as recent policy makers and scholars have tried to make the Just War criteria legalistic, they have weakened the tradition's ability to draw from and adjust to its contemporaneous setting. The essays in The Future of Just War seek to reorient the tradition around its core concerns of preventing the unjust use of force by states and limiting the harm inflicted on vulnerable populations such as civilian noncombatants. The pursuit of these challenges involves both a reclaiming of traditional Just War principles from those who would push it toward greater permissiveness with respect to war, as well as the application of Just War principles to emerging issues, such as the growing use of robotics in war or the privatization of force. These essays share a commitment to the idea that the tradition is more about a rigorous application of Just War principles than the satisfaction of a checklist of criteria to be met before waging 'jus't: war in the service of national interest.
Motorcycle maintenance made easy: -- Aimed at the DIY mechanic and students embarking on courses in motorcycle engineering -- Service tasks are described in detail and illustrated with over 900 color photographs --Information on how to build up a toolkit and keep service records --Tools, testing and measuring equipment, oils and workshop equipment --Using a service schedule and keeping records --Engine: Oil and filter, valve clearances, compression test, air and fuel filters, carburetor balance, coolant, spark plugs, clutch and exhaust system --Chassis: Chain, sprockets, tires, disc brakes, drum brakes, wheel bearings, front forks, steering head bearings, rear shock, handlebars, swinging arm bearings, cables, footrests, stands and bodywork. --Electrics: batter, fuses, bulbs, horn, switches and wiring --Accessories: twin horns, fork gaiters, top box and drive chain oiler
An assortment of 18 pieces to pick and mix - from easy classics to great new pieces, this collection covers it all! All Sorts is designed to fit the technique and capabilities of the young player, with easy-to-play piano accompaniments for the teacher. Spectroscopic data acquired in the laboratory provide the interpretive foundation upon which compositional information about unexplored or unsampled planetary surfaces is derived from remotely obtained reflectance spectra. The RELAB is supported by NASA as a multi-user spectroscopy facility, and laboratory time can be made available at no charge to investigators who are in funded NASA programs. RELAB has two operational spectrometers available to NASA scientists: 1) a near- ultraviolet, visible, and near-infrared bidirectional spectrometer and 2) a near- and mid- infrared FT-IR spectrometer. The overall purpose of the design and operation of the RELAB bidirectional spectrometer is to obtain high precision, high spectral resolution, bidirectional reflectance spectra of earth and planetary materials. One of the key elements of its design is the ability to measure samples using viewing geometries specified by the user. This allows investigators to simulate, under laboratory conditions, reflectance spectra obtained remotely (i.e., with spaceborne, telescopic, and airborne systems) as well as to investigate geometry dependent reflectance properties of geologic materials. The Nicolet 740 FT-IR spectrometer currently operates in reflectance mode from 0.9 to 25 Fm. Use and scheduling of the RELAB is monitored by a 4-member advisory committee. NASA investigators should direct inquiries to the Science Manager or RELAB Operator. Pieters, Carle M. and Hiroi, Takahiro and Pratt, Steve F. and Patterson, Bill Goddard Space Flight Center
Minecraft Kid's Stories is a collection of delightful, Minecraft themed short stories. These enjoyable tales are easy to read and extremely appealing to children! With the FIVE amazing short stories included in this book, your child won't be able to put down the collection! Included in this collection are the ever popular Minecraft short stories: Legend of the Nether, Steve's Showdown with Slenderman, Need for Steve, Minecraft Blockheads, and The Case of the Stolen Necklace. Dive into this epic stories and learn about the secrets of the Minecraft Nether... Watch as Steve battles the infamous Slenderman. Rev your engines and get ready to race in Need for Steve, an exciting story in which Steve is on a quest to redeem his friends and take out an evil enemy! Read the tale of the missing Minecraft necklace and find yourself in a block world mystery. Get reading now! Please note that this is not an official Minecraft book. We are not affiliated with Minecraft. Minecraft is a registered trademark and copyright of Mojang/Notch.
'Mother Without a Mask' provides a fascinating and very human insight into the lives of Middle Eastern women who are so often out of sight, particularly from Western eyes.
MANDALA ON BLACK BACKGROUND Coloring Book. This collection of beautiful Mandala designs geometric compositions, will captivate and excite colorists of all ages. Explore the hypnotic beauty of Mandalas and take pleasure in adding your own colors to create your art. Images are printed on one side so you don't need to worry about bleed-through. They are great for beginners, seniors, and kids.
This book explores the relationship between schizophrenia and common sense. It approaches this theme from a multidisciplinary perspective. Coverage features contributions from phenomenology, cognitive neuroscience, philosophy of mind, psychology, and social cognition. The contributors address the following questions: How relevant is the loss of common sense in schizophrenia? How can the study of schizophrenia contribute to the study of common sense? How to understand and explain this loss of common sense? They also consider: What is the relationship of practical reasoning and logical formal reasoning with schizophrenia? What is the relationship between the person with a diagnosis of schizophrenia and social values? Chapters examine such issues as rationality, emotions, self, and delusion. In addition, one looks at brain structure and neurotransmission. Others explore phenomenological and Wittgensteinian theories. The book features papers from the Schizophrenia and Common Sense International Workshop, held at New University of Lisbon, November 2015. It offers new insights into this topic and will appeal to researchers, students, as well as interested general readers.
